**CDX Tasksheet Number: C105**

1. Research the following specifications and procedure in the appropriate service information.
  - a. Transmission/transaxle service interval: \_\_\_\_\_ km/mi
  - b. Transmission/transaxle fluid type: \_\_\_\_\_
  - c. Transmission/transaxle fluid capacity: \_\_\_\_\_ qt/lit
  - d. Final drive service interval: \_\_\_\_\_ km/mi
  - e. Final drive fluid type: \_\_\_\_\_
  - f. Final drive fluid capacity: \_\_\_\_\_ qt/lit
2. Following the specified procedure, drain the transmission/transaxle fluid into a clean drain pan. Inspect any residue and debris in the bottom of the drain pan. List your observations:
3. Determine any necessary action(s):
4. Drain the final drive unit (if separate from the transmission) into a clean drain pan. Inspect any residue and debris in the bottom of the drain pan. List your observations:
5. Have your supervisor/instructor verify fluid removal and your answers. Supervisor's/instructor's initials: \_\_\_\_\_
6. Following the specified procedure, refill the transmission/transaxle and final drive unit. Replace all fill plugs and tighten them to the proper torque. List your observations:
7. Have your supervisor/instructor verify satisfactory completion of this procedure, any observations found, and any necessary action(s) recommended.
