Total time _____

CDX Tasksheet Number: C239

1. Research the specified brake fluid and the bleeding/flushing procedure for this vehicle using the appropriate service information.

- a. Specified fluid: _____
- b. Bleeding/flushing sequence: _____
- c. Bleeding/flushing precautions: _____

2. Locate the master cylinder reservoir.

- a. List the level of the brake fluid: _____

NOTE If the brake fluid is below the minimum level, it could mean there is a leak in the system or the disc brake pads are worn. Investigate these possibilities and report them to your supervisor/instructor.

3. If appropriate, add the appropriate type of brake fluid to the master cylinder reservoir to bring it to the full mark.

4. Knowledge Check: What precautions should be taken when brake fluid is stored?

5. Knowledge Check: List the different types of brake fluid available:

6. Have your supervisor/instructor verify satisfactory completion of this procedure, any observations found, and any necessary action(s) recommended.
