

**► TASK** Install wheel and torque lug nuts.

**MAST**  
5A4

CDX Tasksheet Number: C251

Time off \_\_\_\_\_

Time on \_\_\_\_\_

Total time \_\_\_\_\_

1. Install the wheel(s), place lug nuts on studs with the proper side facing the wheel, and torque them to proper torque in the specified sequence.

**NOTE** The lug nut contact face **MUST** match the contact face in the wheel. If the wheel contact face is tapered, the lug nut contact face **MUST** also be tapered to match. If the contact face in the wheel is flat, the contact face of the lug nut **MUST** be flat. If in doubt about which way the lug nuts should face, ask your instructor.

2. To what torque did you tighten the lug nuts? \_\_\_\_\_ ft-lb/ N·m
3. Reinstall any wheel covers that have been removed.
4. Have your supervisor/instructor feel brake pedal application and determine whether a test drive is necessary to final adjust the brakes and verify satisfactory operation of brakes.
