1. Research the procedure to test exhaust back-pressure on this vehicle in the appropriate service information.
  - a. List the location for installing the back-pressure gauge: \_\_\_\_\_
  - b. List the maximum allowable back-pressure: \_\_\_\_\_ in/hg or psi/kPa at \_\_\_\_\_ rpm
2. Install the back-pressure gauge according to the specified procedure.
3. Measure the exhaust back-pressure, being careful to follow the specified procedure.
  - a. List your readings obtained: \_\_\_\_\_ in/hg or psi/kPa at \_\_\_\_\_ rpm
4. Determine any necessary action(s):
5. Have your supervisor/instructor verify satisfactory completion of this procedure, any observations found, and any necessary action(s) recommended.
