- 1. List the automatic transmission fluid loss or condition concern:
- 2. Safely raise and support the vehicle on a hoist. Inspect the transmission for any fluid leaks. List the source of any leaks:
- 3. Place a few drops of transmission fluid from the transmission on a clean white paper towel. The transmission fluid should have a clean appearance on the towel. If the center portion of the fluid is dirty, then the fluid is dirty. List your observation(s):
- 4. Smell the transmission fluid. Compare it to a fresh sample of the correct transmission fluid. List your observation(s):
- 5. If the fluid is in poor condition, ask your instructor if you should change the fluid and filter. If so, inspect the bottom of the pan once it is removed. List your observation(s):
- 6. Determine any necessary actions to correct the fault(s):
- 7. Have your supervisor/instructor verify satisfactory completion of this procedure, any observations found, and any necessary action(s) recommended.
