

► TASK Measure rotating torque; determine needed action.

MAST
3E2:2

CDX Tasksheet Number: C786

Time off _____

Time on _____

Total time _____

1. Research the procedure and specifications for measuring the rotating torque on the limited slip differential in the appropriate service information.
 - a. Specified breakaway torque: _____ ft-lb/N·m
 - b. List, or print off and attach to this sheet, the steps for measuring the rotating torque:

2. Following the specified procedure, measure the rotating torque: _____ ft-lb/N·m
 - a. Is this within specifications? Yes/No (Circle one)

3. Determine any necessary action(s):

4. Have your supervisor/instructor verify satisfactory completion of this procedure, any observations found, and any necessary action(s) recommended.
