**CDX Tasksheet Number: C867**

1. Connect the scan tool to the vehicle in accordance with the manufacturer's instructions and, while using the scan tool directions, perform active tests on at least two actuators. List the actuators tested and the results of those tests:

2. Determine any necessary action(s):

3. Have your supervisor/instructor verify satisfactory completion of this procedure, any observations found, and any necessary action(s) recommended.
